SUMMARY:

Frontend web developer with expertise in creating responsive and visually appealing UIs, experienced in working with large projects.

TECHNICAL SKILLS:

- **Frontend** - React Js, Next Js, Vue Js, Nuxt Js, Typescript
- **State Management** - Context API, Redux, Zustand, Vuex, Pinia
- **Styling & Components Libraries** - Tailwind CSS, ShadCN, Aceternity UI
- **Visualization Tools** - React Flow, Vue Flow, Charts Js, ApexCharts Js
- **API Integration** - Fetch API, Axios, Tanstack/React Query
- **Deployment** - Deployment of React Js, Next Js, Vue Js, and Nuxt Js to VPS/EC2 & managed services
- **Versioning & Automation** - Git, GitHub, and CI/CD pipelines for auto-deployment

EXPERIENCE:

Frontend Developer - Signup Solution, 6th Rd, Rawalpindi | October 2023 - November 2024

- Developed and optimized frontend modules for CRM, referral management, and reminder systems.
- Created dynamic and automated workflows for email campaigns with drag-and-drop functionality
- Implemented contact management, email templates, pipeline management & referral tracking features.
- Solved complex UI challenges, including dynamically resizing workflow nodes to prevent overlap.
- Designed and integrated role-based access control for frontend resources and permissions.

PROJECTS:

[\[Link \]](#) **Ez CRM** - Customer Relationship Management system

- Integrated email functionalities on the front end, including Inbox, Sent, Drafts, Spam, and Trash.
- Developed a pipeline management system with multiple dynamic stages created by users, along with static "Won" and "Lost" stages. Each pipeline has multiple deals with draggable and tabular views.
- Enforced comprehensive form/input validations across the project.

[\[Link \]](#) **Ez Referral Path** - Referrals Management System

- Managed customer records, inbound/outbound referral tracking, and location management with map integration.
- Designed network, entity, and service provider management features with support for various requests.
- Developed team/role management functionalities, provided statistical insights, and enforced role-based access control.

[\[Link \]](#) **Ez Reminder** - Automated Reminders Management System

- Implemented separate workspaces, developed a contact management system, and created customizable email templates.
- Designed and managed campaign functionalities, built workflow automation based on predefined templates and applied global project settings.
- Developed reports to showcase multiple KPIs and ensure comprehensive project insights.

[\[Link \]](#) **Workflow** - Email Workflow Creation Tool

- Designed a flexible system for creating interconnected workflow nodes with seamless drag-and-drop functionality.
- Implemented dynamic node resizing and real-time visual updates to ensure clear, organized workflows.
- Enabled conditional branching and decision-making within workflows for improved automation control.

EDUCATION:

IIUI, Islamabad | Bachelor's Degree in Information Technology | September 2022 - Present | 3.83 CGPA
